

1984 Albin27 Family Cruiser \$9,000 As is.

Joli Jug, gave me nearly 2 decades of pleasure. I'm 82. Ability to maintain and enjoy are declining. Jug needs a new skipper to enjoy, maintain & improve her as much or more than I did.

Engine

Original 61 HP Ford Lehman 4-cylinder diesel.

Rebuilt before January 2004 when I bought & brought Jug from the Chesapeake Bay to the Hudson River's fresh water. Engine has never let me down. Hour gauge now reads 1,774.8 hours.

Forward Cabin

Headliner removed, ceiling faired and painted. Stainless water-tight port holes. Galley sink w/space for induction burner near existing 120V outlet.

120V A/C w/heat pump.

Dining table leg now being replaced. (Table drops to support two-person bunk).

Head

Manual Jabsco, pump replaced in 2023. Ten gallon holding tank. Stand up shower can be installed using existing drain on the floor just below bottom right corner of photo.

Pilot House & Cockpit

Raised pilot-copilot seat improves vision and allows opening of engine hatch.
 White oak post: strengthens the ceiling, supports the pilot seat & mast, and makes space for a handhold (at top of post) and a fire extinguisher.
 Large shelf keeps VHF and ChartPlotter/ECHOMAP close to pilot & copilot.
 Starboard & port cushioned benches, with crawl-in size lazarettes below.
 12VDC/120VAC cooler/freezer fits under pilot seat in front of starboard bench.
 Benches seat 4 at folding tables (folding tables not included).
 Sunbrella enclosed w/vinyl windows & screens.

View ahead from co-pilot's seat

Aft Cabin Sitting headroom for two. Starboard and port quarter berths or single nearly queen-size berth. Cushions match forward cabin. Four built-in drawers. Port holes: 4 original (need replacing) & 1 stern port light. (Headliner should be removed.) More lazarettes.

Stern Swim Platform Swing ladder down to swim, up to step up from platform to main deck.

Main Deck

Original stainless rails around bow and stern.
 Handholds on top of: pilot house, forward & aft cabins. Two anchors, one rode with depth tags. Four 8" diameter fenders. Mast for loading bicycle (bike, rack, and lift boom not included).

Miscellaneous

Two 30Amp shore power cables. Required distress signals, day & night. One gallon oil-change pump. One wrench/tool set. For winter storage: 6 jack stands, 6"x6" & 4"x6" blocks, reusable tarp frame. Tarp may have 1 more winter in it.
